Spot Forecast for LINDSEY LAKE TANKER SPILL - I-84 AT MP 54...OREGON DEQ/USEPA
National Weather Service Portland OR
618 AM PST Sun Feb 24 2019

Forecast is based on forecast start time of 0700 PST on February 24.
If conditions become unrepresentative...contact the National Weather
Service Portland, Oregon office.

...ANOTHER WINTER STORM THROUGH MONDAY...

.DISCUSSION...

Light snow expected this morning before the snow level rises and a
rain or snow mix continues much of today. Increasing east flow
through the Columbia River Gorge will bring stronger winds to
impact the incident site later today through Monday. Meanwhile,
the snow level will lower back to the surface to the surface and
significant snowfall can be expected tonight into early Monday.
This may result in reduced visibility from blowing snow, especially
after midnight tonight. Snow will come to an end late Monday, but
snow showers may continue into early Tuesday. Temperatures will
be slow to warm and may only barely get above freezing on Monday,
so expect that snow may be slow to melt before midday Tuesday.

.TODAY...

Sky/weather.....Cloudy. Snow early, then a mix of rain/snow in

the afternoon.
Chance of pcpn.....90 percent.
Max temperature.....Around 40.
Min humidity.....74-79 percent.
Surface winds.....East winds 8 to 13 mph, increasing to 11 to 16
mph in the afternoon with gusts to 25 mph.
Ceiling.....600 feet this morning, rising to 2500 feet in
the afternoon.
Visibility.....2 to 4 miles through the morning, then increasing
to 6 miles or better.
Snow depth.....Around 1 inch.

.TONIGHT...

Sky/weather.....Cloudy. A chance of snow in the evening, then
snow (heavy at times) after midnight.
Chance of pcpn.....70 percent early, 100 percent after midnight.
Min temperature.....Upper 20s.
Max humidity.....83-88 percent.
Surface winds.....East winds 11 to 18 mph with gusts to 30 mph.
Ceiling.....2500 feet early, likely lowering to 1000 feet late.
Visibility.....4-6 miles early, lowering to 1 mile or less after
midnight in heavy and blowing snow.
Snow depth.....2-3 inches.

.MONDAY...

Sky/weather.....Cloudy. Heavy snow, especially in the morning.
Chance of pcpn.....100 percent.
Max temperature.....Around 33 degrees.
Min humidity.....73-78 percent.
Surface winds.....East winds 15 to 23 mph with gusts to 30 mph
decreasing to 10 to 15 mph in the afternoon.
Ceiling.....1000 feet or lower early, possibly rising to 2500 ft.
Visibility.....Less than 2 miles in heavy and blowing snow early,
possibly improving in the afternoon.
Snow depth.....4-6 inches.
